Small
Islands
Project

Research Centre on Migration (Ponza) (Island of Ponza, LT)

The ringing activities contribute to the research on ecophysiology and phenology of migratory birds. The collected data are useful both for monitoring the conditions of birds' populations in Europe as well as to estimate the impacts of land use and climate changes on birds' trends and status.

Your support may make the difference!

With a simple donation you could contribute at the maintenance and improvement of our research activities:
